WHY ALLIES LET GERMANS HOLD SOISSONS TOLD

French and American troops have not occupied Soissons is explained by Maj. De Civireux, military critic of the Matin. There have been apparently authentic reports since Thursday that solssons had been taken. WARM WEATHER DRAWS THRONGS TO LAKE FRONT

Real summer weather yesterday drew hundreds of thousands of Chica goans to the water front and the parks seeking relief. The greater proportion of the immense crowd was absorbed by the bathing beaches, but the Munic-Frant parks got their share of visitors While the mercury did not moun above the 92 degree mark during the day, it seemed much warmer, largely n account of the cool weather of the last few weeks. Cooler weather is expected tonight, but it is expected to emain warm during the greater part of the day.

stated an American battery firin lly on the rear and right flank of the retreating Boches. As the young captain in charge—a New York-er with West Point training—led me to a forward observation post overlocking the German positions on the opposite bank, he gave an account of the battle that illustrates the rapid growth of the American army from hovices in war to experienced soldiers. Reached France in Spring.

A few weeks ago his division was moved into line after a brief training with a French unit subsequent to its arrival in France in the late spring. arrival in France in the late spring.
Its first taste of war was helping to
check the German drive in the region
of Chateau Thierry. Tried by the fiery
ordeal of the past week it is now ready
for anything, confident in its own abliity to take the hardest knocks and
give them back with interest.

"I hope you are not nervous." the
captain said as he walked forward
through the appalling stench of carrion.

"There are no live Fritzes round here any more, but their guns are still pretty busy. For us it is a nice peaceful day compared with the hell they located on Monday, Puesday, and Wednesday. The French interpreter with us said it was as bad as anything he had known at Verdun. Poor devil, they got him the second night." Evidences of Battle Hell.

The words were punctuated by the ceaseless roar of allied guns and the costinual crash of German shells on the road a hundred yards to our right, but there was a shell hole literally every few yards, from the gaping crater of the big "coalboy" to the oval furrow that meant gas. These holes were evidence enough that there was no exaggeration in what he said. He continued:

hone wire scattered everywhere. The embardment has cut the system all to ts. That's one thing we'll fix difmity in the future. And there'll be diggings, too. We had some sches and wire, as you can see, but can never have too much protection and no work is wasted that may ave lives. This was our forward ob-eration post most of the time—as we suched the edge of the woods above heriver—but at the beginning we had nother further down the slope in

Eight horses were demolished in the process, but by a miracle the boy himself was not scratched till noon, when a bullet caught him in the shoulder, and even then his luck held, as he was close to the battery at the time, and we were able to get him out to the dressing station right away. It was a 'Blighty me,' as the British call it, but not langerous. Work of One Lieutenant.

Division Gets 5,000 Men, Swelling It to 27,000 Fighters.

Camp Grant, Ill., July El.—[Special.]—War strength regiments of the Blackhawk division will improve on the records of their red skinned predecessors in the Kishwaukee hills, beginning tomorrow. Announcement made at division headquarters today forecast the transfer into units of the division of 1,000 experienced noncommissioned officers and 4,000 recruits of the One Hundred and Sixty-first depot brigade, beginning at reveille, in order that Maj. Gen. C. H. Martin's fighting division may be operating for the first time in months at full war strength of more than 27,000 men by the end of the week.

The thousand seasoned soldiers who will come to the division from the "noncom" ranks of the depot organization are well up to the standard of

U. S. FUEL CHIEF MAY RECOMMEND **WATER METERING**

Advocates of Law Expect His Support; Saving to Small Consumer.

It is believed Federal Fuel Adminis trator Harry A. Garfield will ask the assage of the ordinance as a fuel con servation move as the result of infor mation given him by Frederic Bass, secretary of the American Association of Engineers, that the Chicago water works use 100,000 tons of coal to pump water that is wasted.

The chief argument to be used by the proponents of the ordinance, however, will be that the small home will have his water rates cut in two

Small Consumer to Benefit, Examination of the water bills in the water collector's office has convinced the friends of the ordinance that under the flat rate rule the small user pays a big premium annually to help large property owners get an excess of water which is wasted.

Comparison of the rates paid by property owners in Austin, where both flat and meter rates are in use, indicates that the man who has a n installed gets all the best of it from a sample block—the "200" block in North Lorel avenue—which indicates the net annual bills of property owners in a typical small home owners' dis

"These figures speak for themelves," Harris S. Keeler, director of the Chicago bureau of efficiency, no single instance does the man pays the flat water rate get away as heaply as the man who pays for just what his meter says he uses. In most ases the meter rate means the

Why the Yellow Cab Leads the World

Do you know that the Yellow Cab Company is the most successful cab company in the world? And do you know the secret of it?

It is summed up in two words: CONTENTED ORGANIZATION.

The officers of the corporation are no more zealous than the drivers of the cabs.

The drivers are thoroughly paid. They have a financial interest in the company. They are not bossed or driven. They are treated like human beings who have as much right to sunshine and luxury as anybody else.

We are not keeping all the profit for ourselves. We know that without good drivers there wouldn't be much of a cab company. And we also know that if every man in the organi-

zation is inspired by the same idea, the public will profit and

SUCCESS IS BOUND TO BE

tion is the happy, satisfied employe.

If a driver is happy he is a living asset instead of a dead burden. If he is well paid, looked after, helped along, assisted to advance and given the right kind of reason for using his talent, he makes his cab a mighty big thing for the public. If he is so well paid that he can give his family a pleasant home, educate his children as they should be educated and give them all some of the luxuries of life to which they are entitled. he is a satisfied man. And the biggest thing in any organiza-

That is why Yellow Cabs are popular. The foundation principle is right. We're all happy. We have no contests of Capital and Labor. We are a big happy family. You can't beat it.

T has been suggested to me that the nery for persuading people to grow vegetables this summer has not been matched with machinery for distribution. A great many people have at the same time, a great many other people have no vegetables and not enough money to buy as many as they need at the prevailing prices. This friend suggests that those who have an

From the standpoint of calories few vegetables are cheap foods. Most of them are principally water and flavor, with erate amount of starch, sugar and proteids. If we except nuts all of them are deficient in fats. We recognize this when we cook vegetables with fats as we do almost invariably. Their value lies in the minerals contained in them, the vitamines, the alkali ash which they form, their freshness, their bulk and their

We read much about the fat soluble substance necessary for the growth of young animals and we are told that butter in order that they may get this substance. But there are sturdy nations who do not keep cows and whose chiliren do not get milk or butter. The Jap children grow up without the services of cows. The young of many animals get no milk after the stage of infancy has been passed. All of these young whether human or animal, get their fat soluble growth substance from the leaves of plants. Children can get this substance from spinach, mustard greens, beet greens, turnip greens, salads of various sorts, lettuce, cabbage, sauer kraut, alfalfa and many other forms of

Vegetable leaves, Vegetable soups not only contain the fat soluble growth principles of the leaves used in making them, but they contain the minerals of the plants as well. In many of our cooking processes the juice water from the vegetables is thrown away. This juice contains much of the mineral matter of the vegetables. The diabetes specialists have shown how a cooking or two will reduce the starch and sugar in some vegetables from 15 per cent of the total weight down to 5 per cent. Vegetable soups retain the minerals and the starch leached out of the vegetables.

LOWDEN SCORNS UNSCARRED SONS OF KAISER

In an address that brought cheer after cheer from 15,000 persons, Gov. Frank O. Lowden, speaking at the annual outing of the Swedish Old People's home at Evanston yesterday afternoon, declared that through the fusion of races democracy would crush autocracy and after the war an everlasting peace would rule the world. "Only this morning," said Gov. Low-

den, "I looked over a casualty list and I found that while there were ten names on that immortal roll, all hailing from Illinois, those ten names represented seven nationalities. When I saw that list I knew that whatever foreboding we might have had in the past, that our people had not been cement into one people, into one nation, those forebodings were forever silenced by esenting seven original nationalities.

"If this war, which is a war to the death between two conflicting principles, should go against us, there will not even be a remnant of our land left which we can call our own, for every foot of it, whatever our form of gov-ernment may be, will be under the dominion, directly or indirectly, of the Prussian autocracy, and will be ruled from Berlin, and not from Washington, my friends. So, we have learned that this war is near us.
"Then, again, we were told by some

of our friends that while it was right that we should engage in war, while we had no alternative, yet we should keep our soldiers at home and not send them cross the sea. But let me rer of what our own great general, Ulysses S. Grant, repeatedly said. In speaking of grand strategy, he said it was simple, very simple. All you had to do was to find where your enemy was and then go to that point and strike your enemy, and strike him with all

"There wasn't a schoolboy in this great city of Chicago who could not have put his finger upon the very spot on the map where our enemy was, and that spot was across the sea. So, if we would be loyal to the teachings of Grant, we have only one thing to do, and that is to send our soldiers in as large and increasing number as pos-sible to that point. That is what of late we have been doing.

"You who have read the papers

know that within the last few even the kaiser and his party, which speered at the American soldier, have found where the American soldier is on the battle line. Now for the last two or three days the American soldier has been, sleeping at night upon new ground, occupied the day before by the alser's troops.

"I want to say one or two things before I close. I want, first, to draw a contrast between two men who have figured largely in the world's eye for a generation. Two men who met, who respected each other's strength, who knew each other's power years before

"I am ashamed of Secretary Burleson for his attitude on the liquor traffic," he said. "Instead of defending the saloons which would destroy the efficiency of our soldiers he ought to exercise his brains to devise means by which how.

by which boys in our camps may send home letters to their mothers and their friends without paying postage."

The suggestion was received with such evident approval that he said: "I believe I will move to send a request to Washington to have this done." A

vote was called for in the midst of the
sermon and the entire audience stood
in an affirmative vote.

"Off, men, with your huts to our
boys as they go by," Dr. Thompson continued. "In a street car I will never
keep my seat and allow a soldier or
sailor to stand. I could hug every one
of them—they are fighting my battles. Burdock Possibilities.

If we allowed hogs to roam at will over our lands, rooting up our gardens and distributing the diseases bred by neglect—if we ignored their food value and destroyed such as became over-troublesome—if we then imported pork to satisfy our needs from the stores of more thrifty countries, we might begin to realize our want of frugality and conservation of resources. Yet that is an actual parallel of our treatment of the burdock, that gross plant with the "stickers."

Dr. Thompson incidentally mentioned the fact he had read the Sunday newspaper in the morning and the remark caused applause. In the afternoon sermon the Rev. W. R. Wedderspoon, pastor of St. James' Methodist Episcopal church, gave the Sunday newspaper a still more emphatic o. k. Tribune Cook Book

"THE UNCHASTENED WOMAN."

It is rarely a play is made over into a picture with such excellent results as have been accomplished in this case. Though seven reels are consumed in telling the tale of the rich, idle, and insolent woman, chaste in body but a mental debauchee living off the emotions of others, there is not a moment when the interest is allowed to lag. Your murderous inclinations alone would serve to keep you wakeful, were the picture less well done. But it stands a monument to the men who produce. An unusual and brilliantly produce. An unusual and brilliantly acted photoplay.

"The woman" is a flirt. She is cruel "The woman" is a flirt. She is cruel and conscienceless and abnormally selfish. Consequences worry her not at all, the reason being that she sees to it the consequences shall affect only others. She is uncannily shrewd. Her intrigues are always extensively chaperoned. So well chaperoned indeed that the investigator for her husband, who wishes a diverge a first shadwing.

who wishes a divorce, after shadowing her night and day for months, is forced to report at last, despairingly:

"I can get nothing on her."

Brought to bay finally, she gives in an inch to save her face and triumphs an ell after her own unholy fashion.

The people supporting Miss Valentine have been picked by some one who knows his business. Technically, I could see nothing with which to find fault. But, let me tell you, as pesky a creature as this unchastened woman would HAVE to be great on looks to get away with it. It is probably such as she—disposition, not appearance—who so often in real life turn up mysteriously missing.

We may be absorbed in the high finance of millions for the Liberty loan or the war savings committees, we may turn to conservation cookery, motor car driving, munitions making, stenography, wireless, but sooner or later we always come back to the problem of the child and how to make it grow up into the best kind of American citizen.

Of what use any of our efforts if the children are neglected? Upon them the future of our nation rests and there is no way of evading our responsibility. Thus say the women of the child welfare committee of the state council of defense who are now planning extensive follow up work in child welfare.

A Message to All Lovers of Music

It is a brave man who will try to dispute the verdict of Galli-Curci, Heifetz, Caruso, McCormack and other supreme judges. This verdict is that the VICTROLA is far superior to all other instruments and the only one worthy of recording their art.

Secure a Victrola now—make the most of the summer evenings

can play ALL RECORDS

The VICTROLA A statement is sometimes made that on account of its absolute supremacy the VICTROLA is high-priced. The answer is a simple one. You can buy a genuine VICTOR or VICTROLA for as little as \$10. Beautiful cabinet styles at exceedingly reasonable figures.

Convenient Terms

We will sell you a VICTROLA and RECORDS for as little as \$5.00 down, with monthly payments of \$5.00.

We offer a Victrola service that is a delight to music lovers

Beautiful examples of the various styles are shown side by side. You can make tests of these so as to secure the type precisely suitable for your needs. You can also learn the beauties of the fibre needles and the tungetone needles. Also the proper occasions on which to use other VICTROLA needles. All of these refinements are brought to your attention under our system.

RECORD ROOMS

These daylight rooms are really soundproof. When you close the door a felt strip moves into its place about the door, which prevents the slightest sound from entering. You have an opportunity to enjoy records under the most ideal conditions.

TESTING ROOMS

In these rooms every VICTROLA is given a most careful examination. VICTROLAS are sold by us as musical instruments. Therefore we see to many things which are unthought of in imitation instruments. There are many refinements which are exclusive in VICTROLAS. DELIVERY

Our own motor trucks enable us to deliver records promptly. Our system also enables us to take proper care of exchanges, and to assist our patrons with our famous WEEK-END RECORD SERVICE. Over 30,000 Chicagoans avail themselves of our Record deliveries.

GARDEN PRIZES Rules Announced to Govern Award of "Tribune" Medals.

THE manner of awarding THE TRIBUNE medals for juvenile war gardens has been tentatively determined by the State Council of Defense. The record book provided by the woman's directing committee is to form the basis of judging.

This record book is to be marked by the supervisor of each school garden.

The record book is to be marked by the teacher in charge of school gardens when such teacher is in charge of summer supervision.

Both the supervisors and teachers marking these books are to report to the ward garden director, a revised list of those who will be ready by next

The record books take into consideration the following points: Attendance, deportment, condition of garden,

If a school garden through the ef-forts of all gardeners in it, wins a prize, the medal will be awarded to the school to be mounted with the names of the gardeners and kept at the school.

Home gardens are subject to the same judging conditions as individual plots in school gardens.

After the supervisors have examined the books and formulated the lists of eligible gardens, these books will be put in the hands of the committee on

The committee in judging the gar-dens will take into consideration the varied garden conditions of the city of Chicago. For instance, the boy or girl in the Ghetto who has the best garden will get a prize, even though that garden be poorer than the poorest garden in Norwood Park or Kenwood.

NEW YORK WEEKLY BONDS

\$2,223,000

West Penn Power Company

First Mortgage 6% Gold Bonds, Series "C"

Interest payable semi-annually, June 1 and December 1, in New York or Chicago. Coupon Bonds in denomination of \$1,000, registrable as to principal only, or exchangeable for fully registered bonds. Coupon and registered bonds interchangeable. Callable as a whole or in part upon four weeks' published notice at 106 and interest on the first day of March, June, September or December, beginning June 1, 1923.

INTEREST NOW PAYABLE, SO FAR AS MAY BE LAWFUL, WITHOUT DEDUCTION OF THE NORMAL FEDERAL INCOME TAX TO THE EXTENT OF 2%

THE EQUITABLE TRUST COMPANY OF NEW YORK, TRUSTER

The West Penn Power Company supplies electricity for light and power to some 78 cities and towns located 10 to 50 miles from the City of Pittsburgh, Pennsylvania, The combined population of these 78 cities and towns, according to U. S. Census figures, increased over 88% in the ten-year period, 1900-1910, and it is estimated that the total population now served is 440,000.

For detailed information regarding these bonds attention is directed to a letter of A. M. Lynn, Esq., President of the Company, a copy of which will be sent on application, from which the following is summarized:

These bonds, in opinion of counsel, are secured by a first mortgage on all the physical property now owned by the West Penn Power Company.

The replacement value of the property is largely in excess of the outstanding bonds.

Additional bonds may be issued only under conservative restrictions.

The mortgage provides a graduated Maintenance Fund ranging from 1½% to 2½% annually of the par value of First Mortgage Bonds outstanding, and in addition the Mortgage provides a Depreciation Reserve Fund amounting to 2% annually of the First Mortgage Bonds outstanding.

The franchise situation is eminently satisfactory, as with the exception of a few small communities from which the Company derives less than 5% of its gross earnings, all of the franchises, in opinion of counsel, are unlimited as to duration.

The territory served comprises one of the best power situations in the

A very large proportion of the power furnished by the Company is being furnished to industries directly contributing to the successful conduct of the war.

STATEMENT OF EARNINGS (As officially reported)

For the Year Ended May 31, 1918 Dec. 31, 1917 Gross Earnings, including Miscellaneous Income. \$4,581,131.60 \$4,000,308.97 Operating Expenses, Maintenance and Taxes... 3,114,294.18 2,713,957.64 Net Earnings \$1,466,837.42 \$1,286,351.33 Annual Interest on \$10,723,000 First Mortgage

i has grown a little closer

| It requires but a brief statement to appreciate how finely money conditions have adjusted themselves in the last twelve months. Within that period the country has subscribed and almost paid for \$9,978,785,950 Liberty loan bonds, including the last issue of 14,170,019,650. Of this sum the banks in the Chicago federal reserve district have handled \$1,407,536,600.

It may be asked how these large changes have been accommodated. Primarily, the increase in the volume of business has been normally taken care of by an increase in deposits. care ofby an increase in deposits.

The wealth of the country has grown and the surplus found its way to the banks. The relation between clearings and deposits for trade purposes has adjusted itself.

But the fextra call for \$11,000,000,000 for taxes and bonds has been met in a different way. It has been accomplished without disturbance through the agency of the twelve federal reserve banks, which have enabled the individual banks to berow money from the bank, just as the individual manutac after the individual banks to berow money from the surplus of the term of the surplus of the surpl

Of War Time Interest This Week

The American That the war makes for The American That the war makes for Officers' a closer linking of Eng-Club in London land with America each day brings additional proof. One of the pleasantest is the creation of a handsome club in London, entirely the gift of English people, for American Officers. The magnificent house of Lord Leconfield in Chesterfield Gardens, Mayfair, with its wealth of priceless Van Dycks, has been given for the purpose.

Every is welcome at this London
American Club, which offers practically
every feature of the most
modern American Club in this
"ancient center of fashionable London".

"Food Will Win —a slogan with which the War—Don't all are familiar and which gives everybody a chance to be a soldier. The United States Food Administration has supplied us with various hints on how it would like people to use foods now, and these will appear from time to time in our daily announcements.

THE SPIRIT OF AMBRICA-

"We Are Going to Counterattack"

"We regret being unable on this occasion to follow the counsels of our masters, the French, but the American flag has been forced to retire. This is unendurable and none of our soldiers would understand their not being asked to do what-ever is necessary to re-establish a situation which is humiliating to us and unacceptable to our country's honor. We are going to counterattack."

This was the reply sent by an American general to a French commander, who after the Franco-American troops were forced to retire south of the Marne, urged that a counterattack be postponed.

Fiber Silk Weaves of Great Modishness

Tricolette, Drop-stitch Jersey and Baronette Satin

THE patriotic reason for wearing Silks has inspired the designers to make them even lovelier than in past seasons, and of a diversity of weight and style which fits every tailored and dress need. Particularly do these favored fiber silk weaves meet the fashionable demands for one piece frocks and separate skirts, tailored suits and capes. Their favor for Autumn is assured.

Baronette Satins—the original, desirable quality, 40 inches wide, navy, gold, flesh tint, rose, taupe, light gray, black and white, a yard, \$4.50.
